

## Objective, Philosophy and Strategy

**Objective** - To achieve a consistent total return for a given risk profile over the longer term with a focus on preserving capital as well as maximising performance; suitable for clients prepared to invest for a minimum of 5 years who can accept capital value fluctuations in the short to medium term to achieve a higher rate of return over the longer term.

**Philosophy** - The portfolio follows an extremely conservative investment strategy and will typically have a significant exposure to cash and fixed interest investments. To ensure the same risk profile is maintained, the portfolio has carefully designed risk controls and will be managed to a specific volatility target and within a defined volatility range.

**Strategy** - The portfolio uses a multi-asset approach, primarily investing in investment funds to provide exposure to a wide range of asset classes which can include equities, fixed interest, property, commodities, alternatives and cash. This is expected to provide more consistent, risk-adjusted returns over the longer term than a strategy based on a single asset class.

## Asset Allocation

## Volatility

	Actual 1 Year	Actual 3 Years	Expected 10 Years
Smartindex 1	2.0%	3.1%	2.3%
