

## Objective, Philosophy and Strategy

**Objective** - The portfolio aims to achieve consistent returns for a given risk profile, over the longer term, from a diversified portfolio offering exposure to a wide range of asset classes. This portfolio is suitable for clients with a time horizon in excess of five years, who wish to grow their investment above inflation and who are prepared to accept capital value fluctuations in the short and medium term in order to achieve an acceptable rate of return over the longer term

**Philosophy** - The portfolio follows a balanced investment strategy so will have an exposure to a wide range of asset classes. To ensure the same risk profile is maintained, the portfolio has carefully designed risk controls and will be managed to a specific volatility target and within a defined volatility range.

**Strategy** - The portfolio uses a multi-asset approach, primarily investing in investment funds to provide exposure to a wide range of asset classes which can include equities, fixed interest, property, commodities, alternatives and cash. Exposure to these asset classes will be sought predominately, although not exclusively, through low cost passive strategies. Where appropriate, exposure will be taken to active managers.

## Asset Allocation

## Volatility

	Actual 1 Year	Actual 3 Years	Expected 10 Years
