

Smartfund Growth Fund

Monthly factsheet as at 30 November 2020

Objective and approach

Investment Objective - The Fund provides investors with potential long-term capital growth from a multi-asset portfolio managed by Smart Investment Management Limited (Smart^{im}), whilst managing the volatility of the fund's net asset value.

Investment Approach - The portfolio strategy consists of long and short positions in a portfolio whose composition is determined by the Investment Manager. The portfolio will have exposure to fixed income, equities, foreign exchange and alternative assets without any particular geographical or industry focus. Smart^{im} will invest and actively manage your portfolio to allow you to take advantage of opportunities that enhance potential returns and, more importantly, to minimise the risks you face.

Key Benefits of the Fund

Peace of mind: Clients benefit from having the custody of their assets with one of the world's largest financial institutions, Morgan Stanley.
Ease of switching: A single range of UCITS IV funds under one roof means switching between the 'protected' and 'unprotected' range will be simple.

Different currency options: The unprotected funds are now available in sterling, dollars and euros.

Focus on costs: The underlying investments will primarily be ETFs, which has greatly reduced the cost that clients will pay for their actively managed portfolios.

The Risk-Graded Strategy

The multi-asset approach is expected to deliver better risk-adjusted returns over the longer term than a portfolio investing in a single asset class. Investment in the Fund is suitable for investors seeking a medium-term appreciation of capital, with the potential for a longer-term investment horizon.
