

.Net Developer - full stack (Yerevan)

Are you a **Full Stack .Net Developer** who can write SQL stored-procs and build .Net applications in your sleep?

Our software engineering team is building new and innovative web applications, backed by our growing service orientated architecture with the intention to interrupt the wealth and advice space. Our goal is to continually build on our core financial engine, while delivering a modern and dynamic web experience for our users. Our tech team is expanding, which means as Full Stack .Net Developer you'll have opportunities to work on green-field applications as well as being able to build on and influence the ongoing direction of existing systems while having plenty of opportunities to learn and improve your understanding of different technologies.

The successful candidate will become part of our ambitious and fast-growing global technology team with a strong team-based and people first culture. You will join one of our many agile development teams focused on innovating our product offering within our market leading technology stack, in a fast-paced agile environment where we ship code daily and package fortnightly releases. You will be encouraged to think outside the box, innovate and have a real thirst for continuous improvement as it's part of our DNA.

We offer a fantastic working environment in Yerevan and a unique opportunity for a new team member to broaden their knowledge, improve their skills and further their career. Including flexible work arrangements, medical insurance, sport activities compensation and professional development opportunities and hackathon days.

Experience, qualifications and attributes sought after:

- At least 2 years of experience in software development
- Strong capabilities with .Net framework
- Good experience with API development
- Strong capability with SQL development, Stored Procedures
- Good knowledge of Javascript and web-based front-end technologies
- Knowledge of AngularJS would be an advantage

- Experience with the Microsoft development stack, including TFS, Visual Studio, GIT
- Understanding of object-oriented programming
- Understanding of finance/ investment technologies is preferable
- Fluency in English language
- Comfortable working in an Agile environment, adopting a consultative and cooperative approach to your work
- Excellent organisational and time management skills, with the ability to manage multiple projects, perform under pressure and adhere to strict deadlines
- Clear and unambiguous communication and presentation skills, in-person and online, via email, phone and digital apps, combined with effective listening skills
