Java Web Developer - full stack (Yerevan)

A unique opportunity for a **Java Web Developer**! Our software engineering team is building new and innovative web applications, backed by an ever-growing network of distributed services, to upset the rapidly growing Financial Advice business.

The software we develop is key in managing over $110 billion worth of investments globally but will also be used by and impact customer all around the world, from Australia to London, Dubai and Hong Kong. Our goal is to continually build on our core financial engine, while delivering a modern and dynamic web experience for our users.

Our tech team is expanding, which means as an experienced developer, you will work alongside other experienced developers to extend our core engine and main product line. You will be working across a complex and rich, yet relatively modern, financial services engine where the database tiers play a key role, and you will have opportunities to work on green-field applications as well as being able to build on and influence the ongoing direction of existing legacy systems while having plenty of opportunities to learn and improve your understanding of different technologies.

We offer a fantastic working environment in Yerevan and a unique opportunity for a new team member to broaden their knowledge, improve their skills and further their career. Including flexible work arrangements, medical insurance, sport activities compensation and professional development opportunities and hackathon days.

Key responsibilities:

- Authors clean, scalable, modular, secure, well-structured, and testable code
- Reads, understands and modifies the existing code
- Designs and implements microservices with thoughtfully defined APIs
- Provides feedback to Business Analysts on complexity and estimates of the project
- Takes ownership of designed services and platform components from conception through to delivery
- Consistently delivers on Sprint commitments & agreed upon timelines by the team.

- Adheres to all industry best practices and standards for Agile/Scrum Frameworks adopted by the Organization including but not limited to daily stand-ups, grooming, planning, retrospectives, sprint reviews, demos, and analytics.
- Work with the local and global teams;
- Share knowledge and experience with colleagues, mentor and lead junior team members
- Support operational aspects of the technology platform

Experience, qualifications and attributes sought after:

- At least 5 years of experience in software development
- Understanding of object-oriented programming
- Strong capabilities with Java Web Development
- Good experience with API development
- Experience working with Amazon RDS/MySQL
- Good knowledge of JavaScript and web-based front-end technologies
- Knowledge of Angular would be an advantage
- Experience with the AWS, Kubernetes
- Understanding of finance/ investment technologies is preferable
- Exposure to an Agile Development Methodology would be beneficial
- Strong analytical and problem-solving abilities
- Strong work ethic and a team player
- Fluency in English language

About Praemium
